DRONE ACADEMY THAILAND

COMPANY OVERVIEW:

Drone Academy Thailand is the number 1 drone training, drone research and drone event organiser. We have won many awards from overseas including Singapore Amazing Flying Machine, Drone Odyssey Challenge and China Drone Racing. Our reputation is recognised by many tv media channels including Channel 3, Channel 5, Channel 7, Channel 9, Channel 11, ThaiPBS and PPTV.

STAFF BACKGROUND:

Our Drone Academy Thailand instructor team has the award for leading a team of drones who won the international performance 3 years in a row. Our school is certified by DJI, the worlds largest drone company in Thailand, DJI Training Centre.

We are trusted by leading organisations both private and public and our staff use training courses from EASA (European Union Aviation Safety Agency), the same standard that CAAT will use as a standard in the pilot drone examination.

AGES CATERED FOR:

Drone Academy Thailand courses are suitable for students 6+.

WHAT PROGRESSIONS DO YOU HAVE FOR INTERNATIONAL SCHOOL PROGRAMS:

Drone Academy Thailand has several programs for students according to their age and skill level including

- Drone Pilot
- Drone Maker
- Drone Programming
- NASA International Space App Challenge
- Drone Aviation and Space
- Drone Design
- FPV Drone Racing

WHAT DO YOU LOVE ABOUT TEACHING:

We love bringing education and sport together and we love being able to bring education to the outdoors so children can expand their horizons and develop their skills. Being involved with drones brings in several different aspects which will benefit our students in a variety of ways.

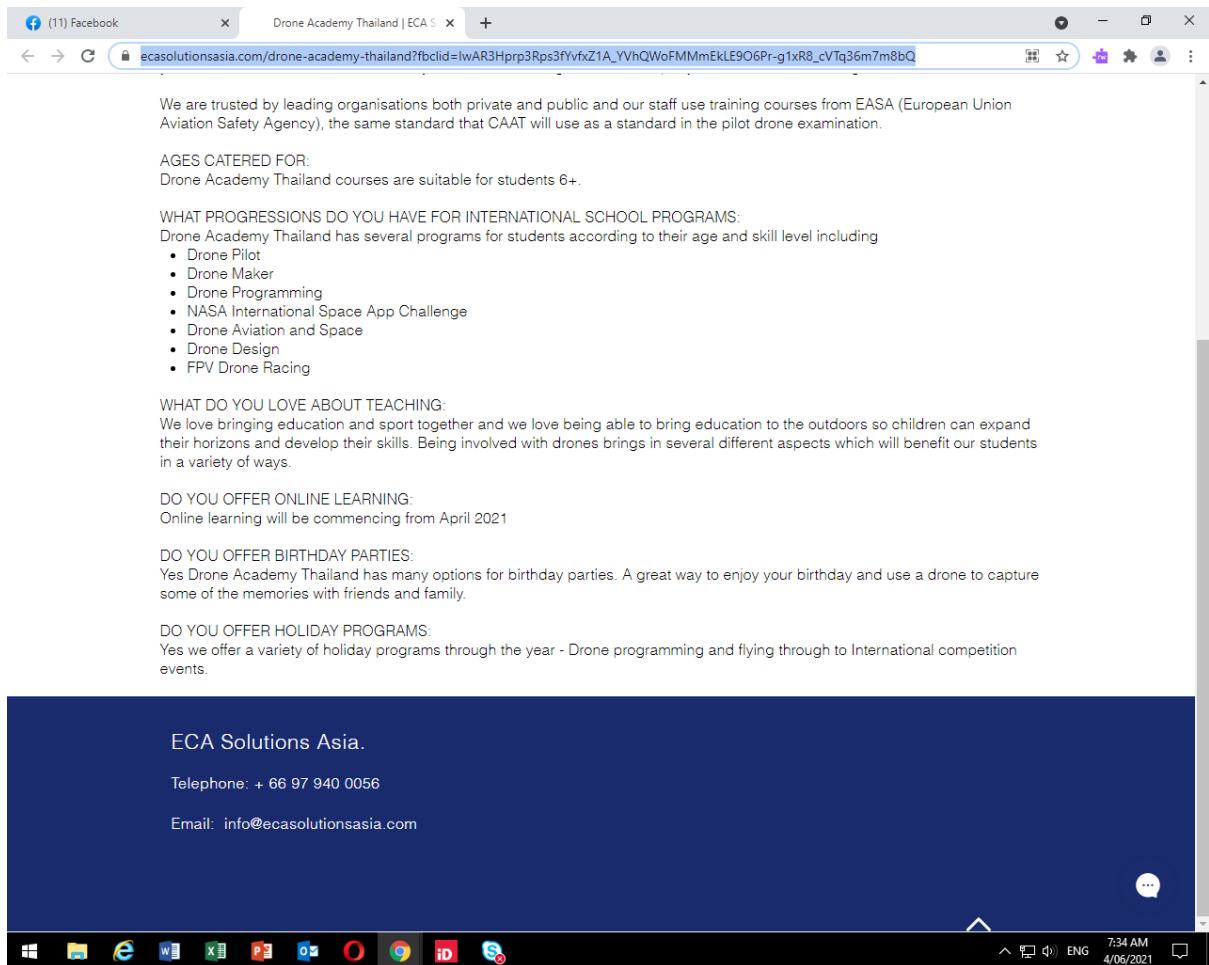

DO YOU OFFER ONLINE LEARNING:

Online learning will be commencing from April 2021

DO YOU OFFER BIRTHDAY PARTIES:

G4003G 12" x 36" Gunsmithing Lathe with Stand

Grizzly's best-selling gunsmithing lathe.

When we set out to design a professional gunsmithing lathe, we felt that we should also make a smaller starter lathe for aspiring hobby gunsmiths. Don't let the "smaller" size fool you – the G4003G 12" x 36" Gunsmithing Lathe is a serious metal lathe. What makes the G4003G a "gunsmithing" lathe is that it comes with features typically not found on standard lathes, such as the high-precision NSK bearings, large 1-9/16" spindle bore and a "spider" mount system.

The spider is especially designed for supporting long workpieces that extend through the outboard end of the spindle.

The tailstock lock system features a drive hub, which allows you to use a 1/2" torque wrench to clamp the tailstock in place at a pre-determined torque setting. This ensures consistent draw-down alignment every time, even with multiple lathe operators using the machine.

Supplied with a 2 HP motor, the 9-speed gearhead of the G4003G produces spindle speeds from 70-1400 RPM.

Like all Grizzly gunsmithing lathes, the G4003G comes with a 1-year warranty covering parts and assuring the unit is free from factory defects. (Consumables are not covered by the warranty.)

The G4003G manual was written by our U.S. based Documentation Department and is packed with useful information. The complete and easy to read manual provides full instructions on how to assemble and maintain your lathe.

The Grizzly Technical Support team is U.S. based. Parts and accessories for the lathe are available on-line and shipped from the Grizzly parts warehouse in Springfield, MO.

SPECIFICATIONS:

- Motor: 2 HP, 220V, single-phase, 8.5 Amps
- Swing over bed: 12"
- Swing over cross slide: 7"
- Distance between centers: 36"
- Bed width: 7-1/4"
- Spindle bore: 1-9/16" (40mm)
- Spindle nose taper: MT#5
- Spindle nose: D1-5 Camlock
- Compound travel: 3-1/4"
- Carriage travel: 30-1/2"
- Cross slide travel: 6-1/4"
- Tailstock barrel taper: MT#3
- Tailstock barrel travel: 4"
- Spindle speeds: 9, 70–1400 RPM
- Overall dimensions: 61" W x 26" D x 54-1/2" H
- Approximate shipping weight: 1330 lbs.

FEATURES:

- High-quality NSK spindle bearings
- Cuts 4-112 Standard TPI and 0.2-4.5 Metric
- Cuts LH threads
- Full-length splash guard
- Spindle on/off reverse switch on carriage
- LED work light
- Socket for tailstock lock
- Heavy-duty steel stand
- Cast-aluminum gear cover

STANDARD EQUIPMENT:

- 6" 3-Jaw chuck with 2-piece reversible jaws
- 8" 4-Jaw chuck with reversible jaws

- 10" faceplate
- Steady rest with roller tips
- Follow rest with roller tips
- Toolbox
- Quick-change tool post with one tool holder
- (2) MT#3 dead centers (1 carbide tipped)
- (1) MT#3 live center
- 1/2" chuck w/ MT#3 arbor

The screenshot shows the UNISIG website's 'Find A Machine' section. The header includes the UNISIG logo and navigation links. The main content area is titled 'Machines for Firearm Industry Manufacturers' and features a sidebar with filters. The 'Firearms' filter is selected, leading to a page with four machine series: UNE, UNR, R-Series, and UNI. Each series has a description and a list of applications.

Machines for Firearm Industry Manufacturers

Find individual machines, or build your complete firearm component manufacturing solution, with UNISIG's precision gundrilling, reaming, and rifling machines. Our machines offer superior process control, allowing firearm manufacturers to produce barrel blanks with unmatched accuracy. Integrated automation is available to support any production volume, for your complete manufacturing solution.

Find machines for firearm industry manufacturing

UNE Series

Gundrilling machines drill extremely straight holes in a variety of applications, including bar stock to prepare for rifle manufacturing.

Designed For:

- > Gundrilling
- > Holes up to 20 mm [0.80 in]
- > Hole depths up to 1500 mm [59.1 in]

UNR Series

After gundrilling, reaming machines remove material from the inside bore surface, meeting roundness and surface finish requirements for production demands.

Designed For:

- > Reaming
- > Barrel calibers from .17 - .50
- > Firearms industry

R-Series

Drilled and reamed bar stock becomes a rifle barrel blank with the servo-driven rifling process, performed with control and accuracy on R-series machines. Button rifling is the last step before being turned and finished into high-performance rifle barrels.

Designed for:

- > Rifling

UNI Series

UNI machines BTA or gundrill a range of applications, including barrel blanks, with the use of multiple-spindle options and integrated robotics for high production environments.

Designed For:

- > Gundrilling, BTA
- > Holes up to 50 mm [2.00 in]
- > Round Workpieces

Build Your Firearms Industry Solution

UNISIG manufacturing technology can be configured to meet your barrel blank manufacturing needs.

Fully Automated Production Cell

For dedicated barrel blank production, UNI multi-spindle gundrilling machines and reaming machines are partnered with rifling machines and also equipped with auto tool return capabilities. Conveyors, robotic automation, gauging, and loading automation further enhance operation for the maximum in production, while maintaining the highest in accuracy standards. [Submit Your Application](#)

Semi Automated Robotic Cell

Automate UNISIG's three machine cell for upgraded production capabilities with robotic automation. Robots rapidly move parts from process to process, with additional options such as cleaning and inspection capabilities. Cells can be configured to meet demands of production, process, and facilities, offering the ultimate in production capability and versatility. [Submit Your Application](#)

Three Machine Cell

UNISIG's UNE gundrilling machine, UNR reaming machine, and R-2A rifling machine team up to create the three machine firearm component cell for intuitive operation of highly accurate barrel blanks. Machines use world-class components and smart controls to ensure the highest levels of manufacturing with real-time feedback. [Submit Your Application](#)

Two Machine Cell

Manufacture barrel blanks with UNISIG's two machine cell with a lower initial investment for lower volume production. UNISIG's UNR reaming machine is combined with precision gundrilling, to perform two processes on a single machine. The R-2A rifling machine uses servo-drives and button rifling to press grooves into the blank with ultimate precision and control. [Submit Your Application](#)
